

**L A S T E C**®

Manufacturer of the  
World's Only High-Definition  
Articulating Mowers

**TURF/COMMERCIAL MODEL 521XR**

### **A Lower Cost 96" Version of the Articulator That Started the Revolution**

The Model 521XR is a five-deck version of the Model 721XR that revolutionized rotary mowing over a decade ago. The 521XR offers a competitively priced option for mowing applications that are best suited to use an eight foot wide mowing deck. The 521XR can be used with a lighter weight, lower horsepower tractor than the 721XR and is perfect for golf course roughs that need a narrower cutting width to mow in tight areas around trees and other obstacles. The Model 521XR offers a superior cut to self-contained mowers that cost over \$25,000 more to purchase. This rugged mower uses the same drives and deck construction as the 721XR which means that it will never be pushed by the toughest cutting requirements.
