ROTAMASTER 4000

Now Easier and Faster Than Ever

With a new unique clamp mechanism and fast aligning jig bars, blade mounting is now easier and faster than ever before, delivering significant benefits in overall cycle time.

Rotamaster ensures both ends of the blade are sharpened equally with the precision only an automated machine can deliver, so your rotary blades have a superior edge with consistent balance for a better quality of cut, resulting in longer lasting blades and better looking grass.

- **Easy** Ergonomic height for ease of use.
- **Self-contained** Takes up no precious bench space.
- **Storage** Room for extra rotary blades right in the unit.
- **Clean** Self-contained vacuum sucks away sparks and dust. Easy to open guards.
- **Safe** Hands are kept free of the working area.
- **Fast** Powerful motor directly coupled to high quality grinding wheel.
- **Effortless** Smooth pneumatically operated automatic traverse to take out the hard work.
- **Automated** Indexed in-feed with adjustable "auto cut-off".
- **Bright** The Rota-Master has its own high powered integral task light.
